- New normal

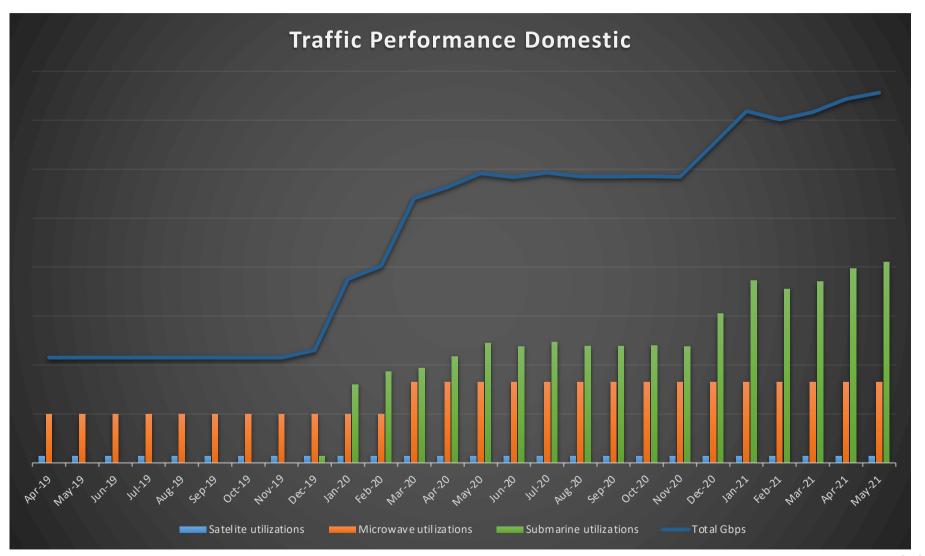

General network update on developments & traffic performance

General network update on developments & traffic performance

Network Coverage 2021

Operational experience and risk mitigation

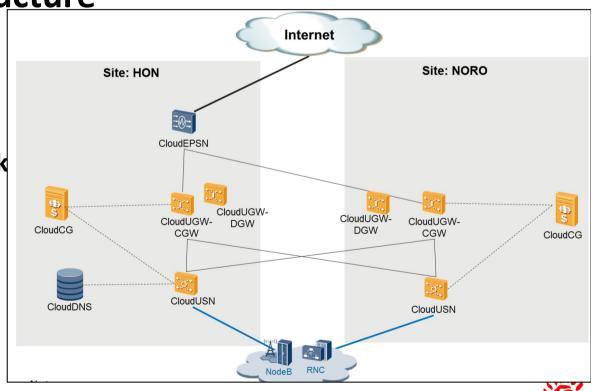

Key areas of focus

1. Server Redundancy

- 1. Redundant domain
- 2. Replicated servers

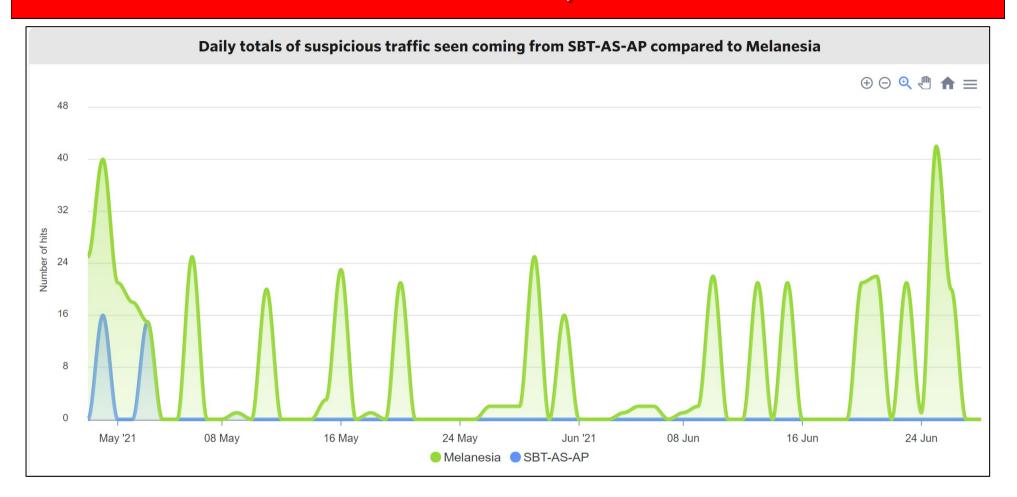

2. Mobile core infrastructure

- 1. Traffic Growth.
- 2. Redundant Core Nodes.
- 3. Service Inheritance.
- 4. Future-Oriented Network
- 5. Modernization.

Network Attacks, Intrusions

SOC as a Service Ionize HAWC

Organizational needs

- Provide a commercially and technically viable alternative to a DIY SOC capability
- Improve compliance, security and risk posture for Our Telekom by providing increased situation awareness of potential and/or actual security and compliance breaches
- Improve Our Telekom capability to respond to breach detection and reducing the effort consumed by false alarms
- Increase customer confidence in the cyber security posture of Our Telekom

SOC as a Service - Onboarding to Ionize HAWC

Stage 1

High-level requirements gathering

Design/approach proposal

Stage 2

Data source assessment

High-level Design

Delivery plan

Stage 3

Detailed design

RACI & SLAs

Define security use cases

Reporting requirements

Stage 4

Deployment plan

Hardware and software procurement

User access

Stage 5

Deploy hardware and software

On board data sources

Software configuration

Security use case deployment

Stage 6

Finalised design

As-built document

Supporting procedures

Stage 7

Configure reporting

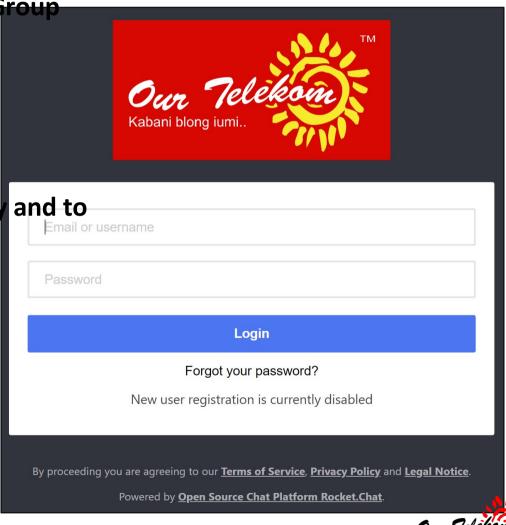

Maintenance schedule

New Normal

RocketChat + Jitsi
